8108234051

Thane, Maharashtra, 400604, IN

I recently completed my Bachelor of Science in Information Technology, where I gained hands-on experience in programming, web development, database management, and software engineering. My academic journey has fueled my passion for solving real-world problems through smart, scalable technology. During my studies, I worked on several academic and personal projects that enhanced my problem-solving skills and deepened my understanding of both front-end and back-end technologies. I'm now eager to take the next step—joining a professional team where I can grow, contribute, and continue learning.
